Pharmacy Rebate Validation Tracker

Empowering self-insured employers with real-time rebate recovery and continuous PBM oversight.

30-Day — **Turnkey MVP Deployment**
Rapid configuration and core screen launch

24 Mos — **Claims Data Requirement**
Historical baseline for pattern matching

STRATEGIC EVOLUTION: TRADITIONAL VS. PROACTIVE CONTROL

CAPABILITY	TRADITIONAL PBM MODEL	SENSA REBATE TRACKER
Data Recency	**Delayed 60–90+ Days** (Quarterly lag dependence)	**Real-Time Daily Ingestion** (Capture before lag reports)
Payout Granularity	Unverified aggregated summary totals	Claim-level matching against contract rules
Contract Rules	Opaque, PBM-controlled calculations	Automated percentage & flat-rate logic
Discrepancy Action	**Lost Leverage** (Post-audit limitations)	**Direct Recovery** (Instant variance alerts & ticklers)

END-TO-END AUTOMATED RECOVERY PROCESS

STEP 01
Claim Ingestion
Daily capture of prescription claims before lag reports.

STEP 02
Rule Matching
Auto-applied contract rates per drug line & PBM.

STEP 03
Variance Alert
Instant flags for underpaid or uncollected rebates.

STEP 04
Fund Recovery
Assigned analyst workflow & direct PBM reconciliation.

Dual Drill-Down Engine
Seamlessly transition from macro block-level rollups to single claimant itemized analysis.

Expiration & Campaign Control
60-day expiration ticklers and instant spreadsheet uploads for focused recovery campaigns.

Take Control of Your Pharmacy Rebates
Confirm 24-month claims data availability to schedule your 60-day solution walkthrough.
