Sensa AI Services
DATA FOR ADVOCACY

Your claims data has the answers. Sensa makes it actionable.

Your plan generates more data than any quarterly report can capture. Sensa turns that data into actionable intelligence so your team knows exactly what needs attention, what is driving your health plan costs, and where to act next, in real time.

Not another report. A tool your team actually uses.

Most reporting tells you what already happened. Sensa tells you what to do about it. By identifying your highest cost claimants early, your team can proactively manage the small percentage of members that have the biggest impact on your renewal

WHAT SENSA GIVES YOU

Early

High-Cost Claimant Flagging

Every member crossing a cost threshold is surfaced in real time, color coded by severity, with days since paid date tracked so you know how fresh the signal is.

Full

Spend Transparency by Quarter

Total paid broken out by quarter, month, therapy, diagnosis, and service type. No more waiting on your TPA to run a report you cannot read anyway.

Live

Budget vs. Paid Variance Alerts

Monthly budget tracking against actual payments with variance surfaced row by row. Know the moment a month is running hot, not three weeks after close.

Clear

Top Therapy Intelligence

GLP1s, specialty biologics, and oncology drugs ranked by spend with indication and claimant count.
Know exactly what the driving cost is before your next renewal conversation.

SPECIFICALLY, YOU WILL SEE

Stop Loss Alerts
Know if your claimant is approaching stop loss BEFORE they hit it across all of your spend, pharmacy, medical and any other vendors.

Claimant level detail
Claim ID, paid date, member age, and total payments in one sortable view

Division level reporting
Spend and claimant counts cut by division so you know which groups need attention

Year over year comparison
Current vs prior year payments side by side, month by month

Geographic distribution
Member and spend concentration mapped by state for network planning

Per claimant per month
A single number your CFO can track and your broker can benchmark

"Helps me identify high-cost claimants in Q1 so I can manage my stop-loss renewal."
HUMAN RESOURCES DIRECTOR, **SENSA CUSTOMER**
